

Infrared Thermography CPD Seminar

Nationwide Coverage
Call. 01382 228 700

Outline

This unique CPD seminar has been designed for all potential users of infrared thermography as a non-destructive test method in the construction and building maintenance industries. This seminar outlines the applications and benefits of thermography and how it can help you save time and money.

Held at your own premises, our trained sales team will present the seminar via Powerpoint presentation. Each presentation lasts approx. 40 minutes with a question and answers session at the end.

Learning objectives

- History of Infrared Thermography
- Principles and methodology
- Applications
- Benefits
- Best times for surveying
- What effects a thermal image

Applications include

- Insulation Analysis
- Delaminating Render
- Flat Roofing
- Leak Detection
- Energy Assessment
- Damp detection
